DETAILED ACTION

Election/Restrictions

Claims 1-14 and 15-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 3.

Applicant's election with traverse of the elected invention in Paper No. 4 is acknowledged. The traversal is on the ground(s) that the amendment to the claims links together the inventions as claimed in claims 1-14. This is not found persuasive because the invention of claim 12 does not require an alignment device; and the invention of claim 1 does not have a sealer tape applied around the butted pipe ends, wherein the sealer tape has a first and second end forming an overlap of the first end around the pipe ends.

The requirement is still deemed proper and is therefore made FINAL.

Information Disclosure Statement

No Information Disclosure Statement submitted.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent 5,458,380, Kanao.

In regards to claim 12, Kanao discloses a sealer joint comprising a pair of thin wall metallic pipe ends (H), each having a squared cut end and a rounded cross-

sectional configuration, the pair of pipe ends positioned in a parallel and an abutted end to end relationship to each other; a sealer tape (9) applied around the abutted pipe ends, wherein the sealer tape has a first end and a second end and the second end forms and overlap of the first end around the pipe ends; and a steel coupling (1) clamped over the sealer tape.

In regards to claim 13, Kanao discloses the steel coupling having means for clamping the coupling and wherein the means for clamping is positioned of the sealer tape.

In regards to claim 14, Kanao discloses the pair of thin walled metallic pipe ends being butted as close together as possible.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, because it illustrates the current state of the art.
